

Chair

Ram

design: Piotr Kuchciński

The Ram chair is the quintessence of industrial design, combining raw elegance with functionality. Its distinctive form, based on a metal construction, gives the chairs a unique character. Thanks to the variety of base options and the possibility of seat customisation, Ram chairs perfectly adapt to the needs of modern office spaces.

Specifications:

Seat:

- Powder-coated perforated metal.
- Upholstered polyurethane foam with a thickness of 5.5 cm, sewn stabilizing magnets - Balma full pattern book

Frame:

- Powder-coated metal - Balma full pattern book.
- Pipe with a diameter of Ø 25 mm.
- Armrest - an integral part of the frame.
- 3 variants of the base available:
 - Legs: powder coated metal.
 - Legs with casters: powder-coated metal
