

Conference table

Demino

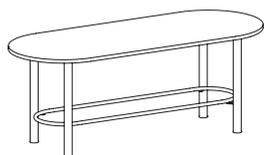

design: Piotr Kuchciński

A system of Demino tables is a family of high and low tables of a very characteristic line and a universal function. Their most appealing aspect is the distinctive and eye catching form. Thanks to the two heights and various sizes of the table tops, Demino system can be used in a variety of spaces, from a large conference room to a get-together with a friend or two at a small table. The tall and low meeting tables will be ideal for common areas in offices, but also in cafeterias or kitchen areas. Large table tops, stable and solid structure combined with a wide choice of colour combinations make Demino system an interesting proposal for any space.
