In

The iconic set of IN office furniture in a new version. Thin tops made of modern materials, trapezoidal frames made of anodized aluminum in a natural color or black anodized, and cabinets and chests of drawers mounted on aluminum pedestals and supported on high legs. As a result, the furniture is characterized by visual lightness and a modern expression.

The interesting shape of the legs and table frames made of noble anodized aluminum will emphasize the prestige of any interior. Table tops are thin and visually light, yet durable. The trapezoidal profile of the legs causes the appearance of the furniture to change depending on the perspective taken.

Cabinets

design: Piotr Kuchciński

Cabinets and wardrobes can be made of natural veneer or varnished MDF in full colors according to our template. This allows us to match the colors to the character of the interior and individual preferences. In addition, the ability to choose the color of noble anodized aluminium in black or natural color adds many interesting combinations.
