

## System regałów

# Steps

design: Piotr Kuchciński

System Steps pozwala na tworzenie ciągów komunikacyjnych i wydzielenie osobnych stref pracy, relaksu i zabawy. Moduły zostały skonstruowane tak, aby można było budować regały przyściennie, narożnikowe oraz wolnostojące z dostępem z dwóch stron. Stabilną konstrukcją tworzą metalowe drabinki połączone półkami. Duża różnorodność elementów systemu Steps pozwala na stworzenie produktu odpowiadającego na indywidualne potrzeby. Standardowe wysokości od 1 do 70H, 3 szerokości półek, szafki, skrzynki oraz drzwi przesuwne pozwolą tworzyć i dopasowywać moduły do potrzeb funkcjonalnych i estetycznych.

### CECHY UŻYTKOWE:

- bogata kolekcja elementów umożliwia dowolną aranżację przestrzeni o różnym przeznaczeniu: biurowym, mieszkalnym czy publicznym
- z elementów systemu można tworzyć regały wolnostojące, przyściennie oraz narożnikowe
- dowolność w dobieraniu oraz tworzeniu własnych rozwiązań funkcjonalnych i wizualnych zapewnia różnorodność dostępnych materiałów i wykończeń
- konstrukcja regałów jest stabilna i wytrzymała
- możliwość samodzielnego montażu oraz dostawa w płaskich paczkach obniżają koszty transportu

## WYKOŃCZENIA:

		metal malowany proszkowo	melamina		okleina naturalna		MDF lakier struktura		tapicerka
			12 mm	18 mm	12 mm	18 mm	12 mm	18 mm
