

## Seating modules

# Podium

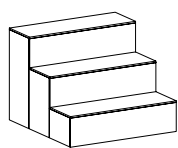

design: Piotr Kuchciński

Podium can be a place to sit or even lie down on, used by a bigger group of people. It is meant for the large spaces where informality, spontaneity and temporariness play a key role. It has been designed especially for relaxation areas, long corridors or rooms where you hold creative meetings. The three different shapes of this piece of furniture will allow for multiple arrangements, so you can use your imagination and adjust the Podium to your own needs. The comfortable cushions will add charm to this structure, whereas a multitude of colours will make all interiors enlivened and diverse.
