

Side tables

Lumo

design: Bogusz Jagiełło

Lumo is a collection of metal tables of an intriguing form. There are three modules in this collection, which can be put together and create a variety of arrangements. The unique geometric shape of these tables resembles a light labyrinth – depending on the time of the day and the lighting these tables will change the way they look. Lumo is much more than just tables. These tables are visually engaging pieces which, apart from being coffee tables, can also be used to display or put away things.

FUNCTIONAL FEATURES:

- stable construction
- 3 available modules, possibility to create arrangements
- combination of the function of a coffee table with storage

CONSTRUCTION:

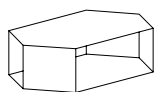

- metal sheet, thickness 2 mm, bent, welded and powder coated (colors according to the Balma pattern book)*
