

Lockers

L2

design: Balma Design Team

Lockers are all about maximum organization in minimal form. They are designed to safely store employees' personal belongings while blending in with the environment in which they are located. Lockers can be locked with a regular or combination lock and can also be equipped with a paper grommet and shelf. L2 lockers are supported on skids or plinths, and their body and fronts are finished with melamine board. The fronts open at an angle of 110 degrees and are equipped with a soft-close mechanism.

Additional equipment:

- shelf in the cabinet: melamine board 18 mm thick; edging 2 mm
- paper grommet: white, black or silver
- self-adhesive plastic label 4x4 cm, according to the template
- combination lock
- other lock at request

COLLECTION FEATURES:

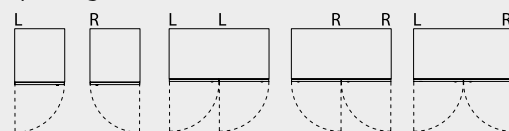

- a modular system of cabinets that allows you to organize space
- 2 types of bases: skid or plinth
- possibility of choosing the colors of the fronts within one module - an option for additional charge
