

## Plant shelf

# Floo

design: Aleksandra Hyz i Aleksandra Mętlewicz

Floo responds to the natural human need for interaction with nature in the workplace. Biophilic design uses potted plants to create natural working and living conditions. In offices without plants, work is less efficient, while in offices with a large number of plants, indicators are much better. It is estimated that the difference can reach up to 15%. The modular and compatible Floo planters collection offers standing and hanging planters, as well as wall panels, available in 4000 different configurations.

### FUNCTIONAL FEATURES:

- a system dedicated to displaying plants
- multifunctionality - the system can also function as a shelf or organizer
- possibility of individual configuration of flower stands and panels

### WALL PANEL:

- Panel: powder coated metal; mounting vertically or horizontally

### PLANT SHELF:

- Vertical panel: powder coated metal; possibility of hanging on the Floo wall panel or fixing to the wall
- Shelf: powder coated metal

### PLANT STAND:

- Vertical panels and shelves: powder coated metal
- Floo plant stands consist of 4 vertical panels connected with each other with one shelf or two shelves
